SOFTWARE DEVELOPER EXPERIENCE

HACK FOR LA | Remote | Los Angeles, CA | February 2025 - Current
Software Developer | Civic Tech, Open Source Website Platform

- Contributed to the website portal by updating project pages and addressing prioritized GitHub issues
- Participated in peer code reviews and created GitHub issues using team templates

USTRIVE | Remote | Austin, TX | February 2023 - April 2023 (Contract)
Full-stack Developer | Online Mentoring Platform

- Added and updated events to **Mixpanel** from the FE and BE to more accurately track mentor and student onboarding processes

MAPISTRY | Remote | Berkeley, CA | May 2022 - January 2023
Full-stack/Front-End Developer | Environmental, Health and Safety Compliance, SaaS Platform

- Developed the existing dashboard's form stencils, form submissions, and custom forms, using **SQL** queries and **React class methods**
- Migrated the FE stack from **Javascript**, **Backbone, React Redux**, and **Sass** to **Typescript**, **React**, **React Query**, **Styled Components**, and **MaterialUI** with feature flag functionality and **Figma** designs
- Implemented a new user flow on the main dashboard by organizing content into subpages, ensuring seamless functionality and integration with the existing site
- Implemented **Jest** unit tests on the FE and **Mocha** unit tests on the BE to ensure code quality

READY | Remote | New Orleans, LA | June 2020 - May 2022
Front-End Software Engineer | Task-based Health Medical Records Client-facing Platform

- Developed patient registration and encounter records used by responders, supervisors, and clinicians, leveraging **React**, **Formik**, **Yup** validations, and **Jest** for unit testing
- Implemented dynamic logic to manage visibility, accessibility, and interactivity of inputs and fields, integrating user role-based authorization with encounter and task lifecycle conditions
- Created several custom, reusable frontend UI **React** components (e.g., Pill, AlertBox, Avatar), using **Styled Components**, **Storybook**, and **Jest** unit tests
- Played an active role in conducting technical interviews of 15+ candidates
- Successfully migrated the app from **Javascript**, **React**, **GraphQL**, and **AWS Amplify**, to **Typescript**, **React**, **GraphQL/Apollo Client**

ERRUNDS | Remote | New York, NY | April 2020 - June 2020
Full-stack Developer Intern | Online Community Marketplace

- Implemented new user signup functionality and authentication
- Implemented cart screen features through the full-stack of the application using **Figma** designs
- Implemented past orders screen display using **GraphQL** queries
- Tech stack: **Javascript**, **React Native**, **React Redux**, **GraphQL/Apollo Client**, **Express**, **PostgreSQL**, **Sequelize**, **Node.js**
